

PRESS ONE-PAGER · UPDATED JUNE 2026

Global Anti-Crime & Safety

What GACS is

GACS is a free, advisory-only public-protection registry that helps ordinary people, journalists, and investigators identify crypto fraud and social-media impersonation before it costs them. The platform combines a human-verified scam database (250k+ entities), an AI-assisted wallet / website / social scanner, real-time scam alerts, and a free Intelligence Academy issuing recognised diplomas (CFPS, CBI, OIA, SCS, MICA). No ads. No paid placement. No recovery upsell. No user payments.

Three pre-written pitch angles

- 1. Alberta-built, used in 40+ countries.** An independent Alberta developer is quietly running one of the largest free anti-scam registries on the internet, used by victims and investigators in 40+ countries. No VC, no ads, donation-funded. A Canadian-tech story without the usual Canadian-tech caveats.
- 2. The AI-impersonator wave nobody is reporting on.** Voice-clone cost dropped from \$1,000+ (2023) to under \$0.01 (2026). GACS catches AI-cloned social profiles (TikTok, X, Instagram, YouTube) in real time and publishes the patterns. Original data, daily updates, photogenic side-by-sides available.
- 3. Free forever — counter-story to the recovery-scam industry.** Every other 'recovery' service charges victims twice. GACS publishes its methodology, AI policy, and data sources openly, and explicitly warns against recovery upsells. A strong contrast piece for consumer-protection coverage.

Quick facts

Founded: 2024 · **HQ:** Alberta, Canada (distributed volunteers EU/US/APAC)

Database: 250k+ verified scam entities, daily updates

Tools: Wallet · website · social-account · message scanners

Languages: English primary; community translations

Model: Free · ad-free · donation-funded · advisory-only

Press contact: press@gacs.app · **Website:** gacs.app

BOILERPLATE & AVAILABILITY

For editors, producers & journalists

Approved boilerplate (≈55 words)

GACS (Global Anti-Crime & Safety) is a free, advisory-only public registry that tracks fraudulent crypto platforms, scam wallets, and impersonation domains. It offers wallet and website checkers, a social-account scanner, real-time scam alerts, and a free Intelligence Academy training thousands of volunteer scam analysts worldwide.

Available on request

Founder bio & headshot · custom screenshots · on-camera interview · data extracts for stories · vetted scam victims willing to be interviewed · expert quotes on AI-enabled fraud, pig-butcherer, romance scams, or recovery-scam patterns.

Typical response time: a few hours during EU/US business hours.

Usage

Free to quote, screenshot, or excerpt with attribution to gacs.app. Logos, the silver GACS.app lockup, app-icon set, and screenshots are available at gacs.app/press-kit.
